Curriculum:  
This major provides students with more breadth than traditional science programs and is appropriate for students planning study or careers in an interdisciplinary area, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service. This major will not prepare students for graduate study in a traditional science discipline nor will it prepare students for technical employment in a traditional science discipline.

Concentration:  
*The four science electives must be upper-level courses from the same department (Bio, Chem, EES or Physics). The Research Methods course must be from same department as well.

Comprehensive Exam:  
Students must schedule the comprehensive exam with the Natural Science Program Director in their final semester.
