A few months ago, the College of Science and Technology dedicated its new Science Education and Research Center (SERC), home to the college’s Physics and Computer & Information Sciences departments, as well as seven research centers and institutes.

SERC is full of extraordinary researchers in materials science, evolutionary medicine, computation and data analytics who are working side by side in the center’s labs, classrooms and meeting spaces. Today, most research breakthroughs are the result of top scientists from several disciplines working together. They are asking important questions, gathering the data and putting the results to use in computers, medicine, evolutionary biology, new materials, energy and more.

Collaboration is vital to science, just as it is to CST’s Development and Alumni Relations staff. Every day we connect with alumni around the world who are leaders in business, education, research and many other fields. We learn what inspires you and where your passions lie.

It was that kind of partnership between alumni and the college that laid the groundwork for our fast-growing Owl to Owl Mentor Program, and led to increased alumni involvement in the Undergraduate Research Program and to more opportunities for CST graduates to work directly with science and technology students.

At CST, we continue to look for new ways to include alumni in the life of today’s students and today’s CST. Let’s meet and talk more about what you love about Temple, how your education impacted your life and ways you can give back to the college. Call or email me directly or come back to campus for a tour of SERC. Or learn more about CST by going to cst.temple.edu/alumni and by following us on Facebook, Twitter and Instagram.

Many CST alumni are also choosing to support the college financially. They are establishing scholarships and awards for deserving students and contributing to their former departments or to collegewide initiatives such as the Endowed Professorship Campaign. Thank you to those alumni and friends supporting CST’s special initiatives.

Sincerely,

Maureen Kuhar, SMC ’88
Director of Development
mkuhar@temple.edu
215-204-4704

THANK YOU!
The College of Science and Technology is committed to exceptional research and teaching through experienced faculty members, scholarship support for talented students and advanced facilities. The college extends its deep appreciation to those alumni and friends supporting CST’s special initiatives.

HONOR ROLL OF DONORS

The College of Science and Technology extends its deep appreciation to the alumni, friends, corporations and foundations that made donations between July 1, 2013 and June 30, 2014. Their generosity means CST can continue to set new standards in research, teaching and engagement with the world.
